Ordering Information

■ Model Number Legend

The model numbers used to order sets of Units are illustrated below. One set comprises the Display, Case, Lamp, and Socket.

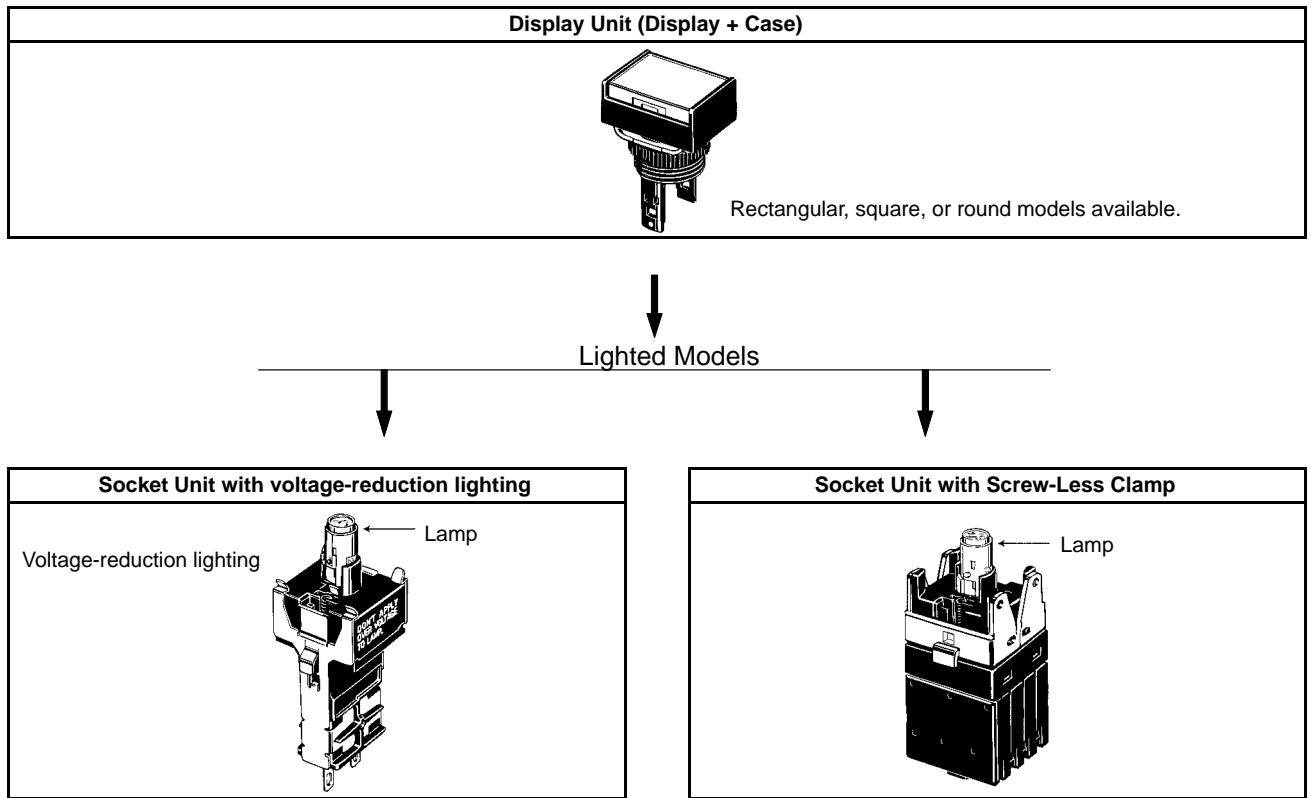

Solder terminals are available only with 100-V models.

The Voltage Reduction Unit is not available for models with PCB terminals.

■ Ordering in Combined Units

In addition to ordering as a set and ordering individually, the M16 can also be ordered as combined Units: the Display Unit (comprising the Display and the Case) and the Socket Unit (comprising the Lamp and the Socket).

■ Ordering as a Set

The model numbers used to order sets of Units are given in the following tables. One set comprises the Display, Case, Lamp, and Socket.

Precautions

Correct Use

Refer to the *Common Precautions* for Pushbutton Switches on page 11.

Refer to the *Common Precautions* for the A16 and M16 on page 77.

Mounting

When mounting the Case onto the Socket Unit, ensure that the orientation is correct. Perform mounting with the ● mark on the Case and the TOP mark on the Socket Unit facing in the same direction.

Wiring

When using stranded wire, gather the ends of the strands together before wiring.

When wiring, insert the wire until it comes into contact with something. After wiring is completed, pull on the wires to confirm that they are connected securely.

After wiring, ensure that continuous pressure is not applied to the terminals.

Refer to internal connections diagrams and confirm the terminal numbers before performing wiring.

ALL DIMENSIONS SHOWN ARE IN MILLIMETERS.

To convert millimeters into inches, multiply by 0.03937. To convert grams into ounces, multiply by 0.03527.
